

GETTING IN DEEP: DISCOVER UNDERWATER WORLD AS A COMMERCIAL DIVER

Background:

Students may occasionally find themselves dreaming of a more exciting career. And, if you're a recreational diver, it is not uncommon to wonder about commercial diving in those moments. After all, could it really be that different? Why not get paid for your hobby? Commercial diving, particularly, is very different from recreational diving. But what is it exactly? What do commercial divers do? And what are the prerequisites? Thus, throughout this 5-days course, students will taste the scale and breadth of tasks that commercial divers undertake. Besides, students will also be experiencing diving in a pool/island with full SCUBA diving equipment.

Learning outcomes:

At the end of the program, participants will be able to:

- i. Learn theoretical aspects of underwater diving
- ii. Distinguish different type of equipment used for underwater breathing/working environment
- iii. Apply research interest in engineering perspective

Themes:

Finding fun in engineering with water sports activity

Fees:

USD1750/ pax

Minimum number of participants: 5 pax
